PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience in Java, Spring Boot, React.js, PostgreSQL, REST APIs, and Full-Stack Development through academic projects and internship experience. Strong foundation in OOP, DSA, DBMS, Git, and JWT Authentication, with familiarity in Apache Kafka, Docker, Kubernetes, CI/CD concepts, and Microservices.

SKILLS

Programming Languages: Java, JavaScript, SQL, C

Backend: Spring Boot, REST APIs, JDBC, JWT Authentication, Node.js, Microservices, Apache Kafka, Java Collections Framework

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Database: SQL, PostgreSQL, MySQL, Firebase Firestore

Cloud & DevOps: Docker, Kubernetes, CI/CD Concepts

Tools: Git, GitHub, Maven, Postman, VS Code, IntelliJ IDEA

AI-Assisted Development: Prompt Engineering, AI-Assisted Coding, GitHub Copilot, ChatGPT, AI-Powered Debugging

Core Concepts: Object Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, System Design

EXPERIENCE

Mass IT Solutions, Pune | Web Developer Intern

Jan 2025 – Feb 2025

Web Development | React.js | JavaScript | HTML5 | CSS3

- Developed responsive web applications using HTML, CSS, JavaScript, and React.js, focusing on clean UI design and cross-device compatibility.
- Built reusable React components and collaborated with mentors to implement frontend features following software development best practices.
- Performed debugging, testing, and UI optimization to improve application usability, responsiveness, and overall user experience.
- Developed a Real Estate Listing Website featuring property browsing, responsive layouts, and interactive user interfaces using React.js.

PROJECTS

• AgriEase – AI-Powered Smart Agriculture Platform

Java | Spring Boot | React.js | PostgreSQL | JWT | REST APIs

Developed a full-stack web application connecting farmers and suppliers through equipment rental and marketplace services. Implemented secure JWT authentication, role-based access control, and RESTful APIs using Spring Boot. Built responsive React.js interfaces, integrated PostgreSQL for efficient data management, and utilized Git for version control while following OOP principles and layered architecture.

• MoodFlix – Mood-Based Movie Recommendation System

Java | JavaFX | Firebase Firestore | REST APIs

Developed a JavaFX desktop application that recommends movies based on user mood. Applied OOP principles and the Java Collections Framework to build a modular application, integrated REST APIs and Firebase Firestore for cloud-based data storage, and designed an intuitive user interface to enhance user experience.

• ApnaGhar – Real Estate Listing Website

React.js | JavaScript | HTML5 | CSS3 | Git

Developed a responsive real estate listing platform using React.js with reusable UI components and responsive layouts. Implemented property browsing and filtering features, followed component-based architecture and clean coding practices, and used Git for version control to improve maintainability and user experience.

EDUCATION

Shrimati Kashibai Navale College of Engineering, Pune

Bachelor of Engineering (B.E.) in Electronics and Telecommunication Engineering

2022 – 2026

CGPA: 8.16/10

Swami Samarth Jr. Arts & Science College

Higher Secondary Certificate (HSC)

2020

92.92%

Saraswati Bhuvan High School

Secondary School Certificate (SSC)

2018

94.60%

CERTIFICATIONS

- Java Programming (Core2Web)
- Super-X Java Project (MoodFlix)
- IBM Getting Started with Enterprise Data Science
- IBM Journey to Cloud: Envisioning Your Solution
